STAIRCASE MEASURING GUIDE
for Straight Stairlifts

_____ ft. / in.

1. Overall Length

Stand at the top of your stairs, extend your tape measure until it is laying on all the stair treads and the tip of the tape measure is touching the landing at the bottom of the steps. Record this measurement.

_____ ft. / in.

2. Top Stair to Bottom Stair

While still at the top of the stairs, retract the tape measure until the end of the tape is even with the outer-most portion of the stair nose of the bottom step. Record this measurement.

_____ ft. / in.

3. Staircase Width

Measure the width of your staircase and enter the measurement.

_____ ft. / in.

4. Bottom Clearance

If there is a wall or a door at the bottom of the steps, measure from the bottom step to the wall.

_____ ft. / in.

5. Rise of One Step

Measure from the top of a step to the very next step down.

_____ ft. / in.

6. Tread Depth

Measure from the front of one step to the front of the kickplate.

_____ ft. / in.

7. Diagonal

Measure from the front of one step to the front of the next step down.

_____ ft. / in.

8. Top Clearance

Measure from the top step to the door, wall, or other obstruction at the top of the stairs.

***NOTE:** It is **IMPERATIVE** that the provided measurements are as precise as possible. If the measurements are inaccurate and the rail installation is not possible at your first installation appointment, you may be charged a return service fee, and a new appointment will need to be scheduled.
